

ULTRA-PURE

Refrigerator Deodorizer & Freshener

Model #32

Instruction Sheet

1. Slide open the bottom battery flap.
2. Insert four (4) C cell batteries in the manner indicated on the inside of the battery compartment.
3. Turn the on/off switch located on the right side of the UP-32 to the "on" position.
4. The GREEN light should now turn on. The light will stay on for approximately two minutes, and then start blinking once approximately every 15 seconds. As long as the light is blinking the air purifier is working. Weak batteries are indicated when the light turns to red.

The batteries will last a minimum of six (6) months.

5. The UP-32 will function best on a higher shelf and near the back of the refrigerator.

You should leave the UP 32 on all the time.

Keeps your food fresh and your refrigerator odor free!
